Web.com Reports Second Quarter 2018 Financial Results

"Web.com reported second quarter financial results that exceeded our revenue and profitability guidance as we continue to execute against our 2018 objectives. In terms of our capital structure, as previously discussed, we intend to payoff the outstanding balance of our senior convertible notes in August using a combination of cash on hand and the currently undrawn revolving credit facility," said David L. Brown, chairman, chief executive officer and president of Web.com.

Brown added, "We continue to work towards finalizing the previously announced transaction for Web.com to be acquired, which is expected to close in the fourth quarter of this year. The 'go-shop' period remains in effect until August 5, 2018."

Use of Non-GAAP Financial Measures

Some of the measures in this press release are non-GAAP financial measures within the meaning of the SEC Regulation G. Web.com believes presenting non-GAAP measures is useful to investors, because it describes the operating performance of the Company, in ways that management views or uses to assess the performance of the Company. Web.com's management uses these non-GAAP measures as important indicators of the Company's past performance and in planning and forecasting performance in future periods. The non-GAAP financial information Web.com presents may not be comparable to similarly-titled financial measures used by other companies, and investors should not consider non-GAAP financial measures in isolation from, or in substitution for, financial information presented in compliance with GAAP.

You are encouraged to review the reconciliation of non-GAAP financial measures to GAAP financial measures included elsewhere in this press release.

Relative to each of the non-GAAP measures Web.com presents, management further sets forth its rationale as follows:

- *Non-GAAP Revenue.* Web.com excludes from non-GAAP revenue the impact of the fair value adjustments to amortized deferred revenue because management believes that excluding such measure helps management and investors better understand the Company's revenue trends.
- *Non-GAAP Operating Income and Non-GAAP Operating Margin.* Web.com excludes from non-GAAP operating income and non-GAAP operating margin, amortization of intangibles, asset impairment, stock-based compensation charges, restructuring expenses, corporate development expenses and fair value adjustments to deferred revenue and deferred expense because management believes that adjusting for such measures helps management and investors better understand the Company's operating activities.
- *Adjusted EBITDA and Adjusted EBITDA Margin.* Web.com excludes from adjusted EBITDA and adjusted EBITDA margin depreciation and amortization expense, loss on sale of assets, loss on extinguishment of debt, asset impairment, income tax provision, interest expense, interest income, stock-based compensation, fair value adjustments to deferred revenue and deferred expense, corporate development expenses and restructuring expenses, because management believes that excluding such items helps investors better understand the Company's operating activities.
- *Non-GAAP Cost of Revenue (excluding depreciation and amortization).* Web.com excludes from non-GAAP cost of revenue (excluding depreciation and amortization) the fair value adjustments to deferred expense and stock based compensation charges because management believes that adjusting for such measures helps management and investors better understand the company's operating activities.
- *Free Cash Flow.* Free cash flow is a non-GAAP financial measure that Web.com uses and defines as net cash provided by operating activities less capital expenditures. The Company considers free cash flow to be a liquidity measure which provides useful information to management and investors about the amount of cash generated by the business after the acquisition of property and equipment, which can then be used for investment opportunities.

In respect of the foregoing, Web.com provides the following supplemental information to provide additional context for the use and consideration of the non-GAAP financial measures used elsewhere in this press release:

- *Stock-based compensation.* These expenses consist of expenses for employee stock options and employee awards under Accounting Standards Codification ("ASC") 718-10. While stock-based compensation expense calculated in accordance with ASC 718-10 constitutes an ongoing and recurring expense, such expense is excluded from non-GAAP results because such expense is not used by management to assess the core profitability of the Company's business operations. Web.com further believes these measures are useful to investors in that they allow for greater transparency to certain line items in the Company's financial statements. In addition, when management performs internal comparisons to Web.com's historical operating results and compares the Company's operating results to the Company's competitors, management excludes this item from various non-GAAP measures.
 - *Amortization of intangibles.* Web.com incurs amortization of acquired intangibles under ASC 805-10-65. Acquired intangibles primarily consist of customer relationships, customer lists, non-compete agreements, trade names, and developed technology. Web.com expects to amortize for accounting purposes the fair value of the acquired intangibles based on the pattern in which the economic benefits of the intangible assets will be consumed as revenue is generated. Although the intangible assets generate revenue, the Company believes the non-GAAP financial measures excluding this item provide meaningful supplemental information regarding the Company's operational performance. In addition, when management performs internal comparisons to Web.com's historical operating results and compares the Company's operating results to the Company's competitors, management excludes this item from various non-GAAP measures.
 - *Depreciation expense.* Web.com records depreciation expense associated with its fixed assets. Although its fixed assets generate revenue for Web.com, the item is excluded because management believes certain non-GAAP financial measures excluding this item provide meaningful supplemental information regarding the Company's operational performance. In addition, when management performs internal comparisons to Web.com's historical operating results and compares the Company's operating results to the Company's competitors, management excludes this item from various non-GAAP measures.
 - *Restructuring expense.* Web.com has recorded restructuring expenses and excludes the impact of these expenses from its non-GAAP measures, because such expense is not used by management to assess the core profitability of the Company's business operations.
 - *Fair value adjustments to deferred revenue and deferred expense.* Web.com has recorded fair value adjustments to acquired deferred revenue and deferred expense in accordance with ASC 805-10-65. Web.com excludes
-

the impact of these adjustments from its non-GAAP measures, because doing so results in non-GAAP revenue and non-GAAP net income which are reflective of ongoing operating results and more comparable to historical operating results, since the majority of the Company's revenue is recurring subscription revenue. Excluding the fair value adjustments to deferred revenue and deferred expense therefore facilitates management's internal comparisons to Web.com's historical operating results.

- *Corporate development expenses.* Web.com incurred expenses relating to acquisitions and the successful integration of acquisitions. Web.com excludes the impact of these expenses from its non-GAAP measures, because such expense is not used by management to assess the core profitability of the Company's business operations.
- *Gains or losses from asset sales or impairment and certain other transactions.* Web.com excludes the impact of asset sales or impairment and certain other transactions including debt extinguishments and the sale of equity method investments from its non-GAAP measures because the impact of these items is not considered part of the Company's ongoing operations.
- *Monthly average revenue per user, or ARPU.* ARPU is a metric the Company measures on a quarterly basis. The Company defines ARPU as quarterly non-GAAP subscription revenue divided by the average of the number of subscribers at the beginning of the quarter and the number of subscribers at the end of the quarter, divided by three months. The Company excludes from subscription revenue the impact of the fair value adjustments to deferred revenue resulting from acquisition-related write downs.

Note that the Company has not reconciled Adjusted EBITDA guidance to GAAP net income because it does not provide guidance on GAAP net income or the reconciling items between Adjusted EBITDA and net income as a result of the substantial uncertainty regarding, and the potential substantial variability of, these items. The actual amount of net income and such responding reconciling items will have a significant effect on Adjusted EBITDA. Accordingly a reconciliation of the non-GAAP financial measure guidance to the corresponding GAAP measure is not available without unreasonable effort.
